

*Learn French by using
all your senses and
you 'll be successful!*

Your advantages

- You learn with fun - no swotting or memorising
- You learn three times as fast.
- 500 words in five days.
- We address the needs of every type of learner.
- By activating all cognitive levels in your brain, you are able to absorb the lessons faster and retain them more easily in your long-term memory
- Learn with all your senses.
- Learn how to speak spontaneously and without fear or hesitation.

*Learn French in France the
way you want!*

*5 days of intensive &
individual training in
Grimaud, Côte D'Azur*

Statement:

"Merci encore, c'était très sympa!"

Á bientôt."

Franck Ribéry

(Learned German in Munich)

"First of all I received very practical results from the program. I was soon able to use the language myself and to talk in this foreign language.

I just can recommend this teaching method to anyone who wants to learn fast, easy, with fun and have quick practical results."

Learn French in France for your special needs!

Nathalie Zell - Sprachen is an institute for foreign languages trainings and conversation. The company is specialised in teaching

French and German.

My method is based on scientific studies and results of memory research.

- * learn with fun, no swotting or memorising
- * learn to talk immediately
- * learn with all your senses
- * learn the way you are (different types of learners)
- * use all parts of your brain to learn more and faster
- * learn 500 words and sentences in 5 days – an intensive & individual training course
- (from 9.am to 1. pm 5 days long)

By activating all cognitive levels in your brain you are able to absorb the lessons faster and retain them in your long – term memory and you will learn three times as fast!

You learn to speak spontaneously and without apprehension.

Learning by using all your senses and you 'll be successful!

Learning a language through the deployment of your senses helps you to experience it in a more intensive way.

For example: lessons given will not only be read, but also acted authentically.

Therefore you will be able to memorise and recall sentences or expressions in connection with gestures. You will learn vocabulary acoustically and visually.

Learning is a piece of cake!

Why do we learn slower as we get older?

Scientists have found out that one of the main reasons is the preoccupied perception and the loss of the playful learning practiced by children. Therefore my training is also based on playful elements realising that learning with fun and without stress will be more successful and easier.

Learning in an atmosphere of ease

The keystone of my training concept is learning in an atmosphere of ease and relaxation. As scientific studies have proved, the receptivity will remarkably decrease during stress situations. In contrast to the normal – frontal method, learning by relaxation will increase the speed comparatively up to 300 %.

Learning communicative skills

You will practice to communicate in the foreign language from the first moment on. You will learn how to speak and understand. After your training you will be able to cope with different situations and other people without any trouble or fear.
